SICKHEADACHE.—Inflammation
of the nasal mucous
membrane, or the nasal catarrh,
sometimes protracted, and called chronic,
is a common disease, particularly among
young children, who are always sus-
ceptible to it. It is a disease of the nose,
causing the nostrils to become swollen,
and obstructing the air passage. The
breath is offensive, and the nose is
often filled with mucus, impeding respiration.
It is often accompanied by a fever, and
other symptoms are liable to be present in
any one case. Attacks of catarrh usually
last from a week to half of the above-mentioned
time, but are often protracted. In
some cases it is common, more dan-
gerous, or less understood by phys-
icians.

By its irritant, swelling and heating properties,
it causes intense pain, if not relieved, it
causes great trouble, and even headache.

SICKHEADACHE.—
A single tablet every three to four hours.

"Endless Agony from Catarrh."

PROF. W. MARCHAND, the famous magnetist,
of Leaven, N. Y., writes: "Some ten years ago I
had a bad attack of catarrh, which was so severe
that my family physician said he could
not cure me, and said I must die. My case was
so bad that every day I was becoming
weaker, and I could hardly move, and
was above a whisper. I was continually
coughing and clearing my throat would
almost strangle me. By the aid of Dr. Marchand
I am now a well man. I believe it to be the
only sure remedy for catarrh now manufactured,
and one has only to give it a fair trial to experience astounding results and a permanent
cure."

A complete Treatise on Catarrh, giving val-
uable hints as to clothing, diet and other matters
of importance, will be mailed, post-paid to any
address, on receipt of a two-cent postage stamp.
